## **DETAILED ACTION**

### ***Election/Restrictions***

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-53, drawn to a cell culture container, classified in class 435, subclass 297.5.
- II. Claims 54-120, drawn to a method of culturing cells, classified in class 435, subclass 297.5.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e). In this case the apparatus can be used in a number of additional applications. The cell culture container as claimed could be used to accommodate essentially any chemical or biological fluids, and facilitate a plurality of different reactions. The container could be used to store blood or other biological samples, or could be used to separate cells that adhere to the fibrin matrix from cells that do not.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1744

Applicant is advised that the reply this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
